### Personal Data

Married, three children  
German citizen

### Research Interests:

My current research interests are primarily directed towards developing and analyzing theoretical models of dynamic R&D processes. This includes the analysis of experimentation strategies and learning process in R&D competition. The research draws on methodologies of game theory and statistics. My future research will also combine game theoretic methods with cell biological and molecular biological approaches to investigate group and population formation processes in the presence of externalities.
